PSYC 1101 Final Flashcards | Quizlet

A shopper buys a brand-name over-the-counter allergy medication because of past good results with it, and because it's what the shopper is used to buying. She makes the purchase even though she sees a cheaper generic version with the same exact same formulation of ingredients, and even though she recently saw a TV story about how generics are just as good as the brand-name

Immune system - Wikipedia

Ebooks 5 Years Without Food The Food Allergy
Survival Guide How To Overcome Your Food Allergies
And Recover Good Health.pdf

The immune system is a network of biological processes that protects an organism from diseases. It detects and responds to a wide variety of pathogens, from viruses to parasitic worms, as well as cancer cells and objects such as wood splinters, distinguishing them from the organism's own healthy tissue. Many species have two major subsystems of the immune system.
