### **Thomas Jefferson, 1743-1826. Notes on the State of Virginia**

*A fountain of common water, issuing within a few inches of its margin, gives it a singular appearance. Comparing the temperature of these with that of the Hot springs of Kamschatka, of which Krachininnikow gives an account, the difference is very great, the latter raising the ...*

*4 8 16 In the first call to the function, we only define the argument a, which is a mandatory, positional argument. In the second call, we define a and n, in the order they are defined in the function. Finally, in the third call, we define a as a positional argument, and n as a keyword argument.. If all of the arguments are optional, we can even call the function with no arguments.*

### **In-situ FTIR ?ReactIR - Mettler Toledo**

*Continuous measurements from infrared spectrometers are used for obtaining reaction profiles to calculate reaction rates. A list of publications from peer-reviewed journals focuses on exciting and novel applications of ReactIR. Researchers in both academia and industry employ in situ mid-FTIR spectrometers to provide comprehensive information and rich experimental data that to advance their ...*
