Peak envelope power - Wikipedia

Peak envelope power (PEP) is usually given as the peak-envelope power or PEP and expressed in dBm. It is related to the envelope modulation that can be constant or non-constant. In the first case the PEP power = RMS root mean square power. In the second case, PEP Power = RMS power + PAPR power (peak-to-average power ratio).

About - Ed's Antennas

I first introduced the concept of this antenna in Feb. 2003 QST. It is the same antenna that appears on the front cover of the ARRL VHF/UHF Antenna Classics Handbook. It also won the best paper of the month award. It offers true 1/2 wavelength performance at both VHF and UHF with no ground radials. SWR is less than 1.3 to 1 on both bands.

ARRL Handbook 2020

In 1926, ARRL introduced the first edition of The Radio Amateur's Handbook, written by F. E. Handy. Since then, each edition has been recognized as a benchmark for radio communications learning and applied knowledge.
