Biomes Webquest - Mr. James 5th Grade

31/12/2010 · A biome is made of many similar ecosystems. Ecosystems are the interactions between the living things and the nonliving things in a place. In an ecosystem, the plants, animals, and other organisms rely on each other and on the physical environment – the soil, water, and nutrients, for example. An ecosystem is often much smaller than a biome, although the size varies. 2 At any given ...
