Ebooks Implicit Differentiation Homework Answers

dummies

Ebooks Implicit Differentiation Homework Answers

Implicit Differentiation — Practice Questions. Implicit differentiation problems are chain rule problems in disguise. Here's why: You know that the derivative of $\sin x$ is $\cos x$, and that according to the chain rule, the derivative of $\sin(x^3)$ is $\cos(x^3) \cdot 3x^2$. You could finish that problem by doing the derivative of x^3 , but there is a reason for you to ...

Implicit Differentiation - Classwork

Implicit Differentiation - Classwork Suppose you were asked to find the slope of the tangent line to the curve $x^2 + y^2 = 25$ at the point $(4, 3)$. First, we can solve for y . Next, take the derivative: and simplify. Now plug in the value of $x = 4$. Clearly, we have a problem. We have a \pm in our derivative. Which one is it?
