Leptospirosis - VISAVET

La leptospirosis es una enfermedad causada por bacterias del género Leptospira. Son espiroquetas Gram negativas, aerobias estrictas, de forma helicoidal, flageladas y móviles. Este género está integrado por dos especies: Leptospira interrogans (que comprende las formas patógenas) y Leptospira biflexa (para las formas de vida libre o saprófitas).

Microbiology Microbes Bacteria Information and Links ...

Mucor spp., fruiting structure with spores. Magnification 400, scanning electron microscopy. The fruiting structure (conidiophore) has matured and its outer membrane is disintegrating allowing the spores to be released. Mucor is a common fungus found in many environments. It is a Zygomycetes fungus which may be allergenic and is often found as saprobes in soils, dead plant material (such as hay ...
