Van Hiele model - Wikipedia

In mathematics education, the Van Hiele model is a theory that describes how students learn geometry. The theory originated in 1957 in the doctoral dissertations of Dina van Hiele-Geldof and Pierre van Hiele (wife and husband) at Utrecht University, in the Netherlands. The Soviets did research on the theory in the 1960s and integrated their findings into their curricula.

Classroom Lessons | Math Solutions

A Lesson for First and Second Graders by Chris Confer This whole-class lesson is adapted from the Math By All Means replacement unit Geometry, Grades 1–2, written by Chris Confer. By folding a square of paper in several predetermined ways, children investigate and record the different shapes they can make.

Doing the Math: Analysis of Forces in a Truss Bridge - Lesson

In this lesson, students learn the basics of the analysis of forces engineers perform at the truss joints to calculate the strength of a truss bridge. This method is known as the “method of joints.” Finding the tensions and compressions using this method will be necessary to solve systems of linear equations where the size depends on the number of elements and nodes in the truss. ...

First Grade Math Worksheets

Check your answers with the guided lesson explanation. Then move on to the worksheets. If you feel you are doing well, take a shot at a quiz. If you score north of 85%, you are in good shape. If not, go back and crack away at the practice sheets to get you in better standing. Always refer back to the original lesson, when in doubt.
