### **Pap Smear: Overview, Indications, Preparation**

*31/5/2018 · The mainstay of cervical cancer screening for the last 60+ years has been the Papanicolaou test. The Papanicolaou test, also known as the Pap test or the Pap smear, was developed in the 1940s by Georgios Papanikolaou. It involves exfoliating cells from the transformation zone of the cervix to enable examination of these cells microscopically for detection of cancerous or precancerous lesions.*

### **Pap Smear Referral Guideline**

## Reading New Pap Smear Guidelines 2013 Acog

*· Pap Smear Screening begins at age 21 regardless of when sexual activity starts. Adolescents/young women 20 and below are not recommended to have a Pap test or HPV testing. Pap screening may end at age 65 if the Pap history is unremarkable and the patient is low risk. · Screening recommended every 3 years for women 21-29.*

### **Pap test - Wikipedia**

*The Papanicolaou test (abbreviated as Pap test, also known as Pap smear (AE), cervical smear (BE), cervical screening (BE), or smear test (BE)) is a method of cervical screening used to detect potentially precancerous and cancerous processes in the cervix (opening of the uterus or womb) or colon (in both men and women). Abnormal findings are often followed up by more sensitive diagnostic ...*
