Origin Of Life Ap Biology Lab Answers

In evolutionary biology, abiogenesis, or informally the origin of life (OoL), is the natural process by which life has arisen from non-living matter, such as simple organic compounds. While the details of this process are still unknown, the prevailing scientific hypothesis is that the transition from non-

This lab allowed us study the origin of life in a lab setting. Although never been accomplished, this lab intended for us to create coacervates, which are droplets of organic polymers that possess life like characteristics. Similar to Alexander Oparin's experiment, we used carbohydrates, gum arabic, gelatin, and hydrochloric acid.
