Motivation - Wikipedia

Definition. Motivation is commonly defined as what explains why people or animals initiate, continue or terminate a certain behavior at a particular time. Motivational states come in various degrees of strength. The higher the degree, the more likely it is that the state has an influence on behavior. This is often linked to forces acting from within the agent that result in goal-directed ...

What is Motivation? A Psychologist Explains ...

5/11/2019 · The study of motivation in psychology revolves around providing the best possible answers to two fundamental questions: what causes behavior, and why does behavior vary in its intensity? Motivational science is a behavioral science that seeks to construct theories about what constitutes human motivation and how motivational processes work.
