Acid dissociation constant - Wikipedia

Theoretical background. The acid dissociation constant for an acid is a direct consequence of the underlying thermodynamics of the dissociation reaction; the pK a value is directly proportional to the standard Gibbs free energy

change for the reaction. The value of the pK_a changes with temperature and can be understood qualitatively based on Le Châtelier's principle: when the ...

Constante de disociación ácida - Wikipedia, la ...

Para evitar las complicaciones que implica el uso de actividades, las constantes de disociación se determinan, cuando es posible, en un medio de alta fuerza iónica, es decir, bajo condiciones en las que se puede suponer que es siempre constante. [8] por ejemplo, el medio puede ser una solución de 0.1 M de nitrato de sodio o 3 M de perclorato de potasio (1 M = 1 mol·dm⁻³, una ...
