Luc Avérous, in Handbook of Biopolymers and Biodegradable Plastics, 2013. 9.5.1.1 Plasticization. The brittleness and stiffness of PLA can be major drawbacks for some applications. According to Ljungberg et al. [45], any factor influencing PLA crystallinity, such as the isomer ratio, could disturb the distribution and compatibility of plasticizers with PLA and induce low efficiency and phase ...

How Carbon Capture Works | HowStuffWorks

9/7/2008 · Carbon atoms represent around 12 percent of all the atoms in your body. To put that in perspective, a 176-pound (80-kilogram) person contains roughly 31.7 pounds (14.4 kilograms) of carbon. We think you'll agree that's a significant figure. Of all the elements required to make a human "bod," only oxygen accounts for more body mass.
